

Jathar Mayur

Pune, Maharashtra, India |mayurjathar77@gmail.com| +91 7498365260

Professional Summary

Results-driven **Java Full Stack Developer** with **2+ years of hands-on experience** in designing, developing, and maintaining scalable web applications using **Java, Spring Boot, Angular/React, and RESTful APIs**. Proficient in both front-end and back-end development with a solid understanding of object-oriented programming, microservices architecture, and database design. **Experienced in Agile/Scrum methodologies, version control, cloud deployment (AWS), and CI/CD pipelines**. Experienced in frontend development and **DevOps tools**, ensuring full lifecycle ownership from development to deployment.

Technical Skills

- **Backend:** Java, Spring Boot, Microservices, RESTful APIs, JPA, Hibernate
 - **Frontend:** HTML, CSS, JavaScript, React.js, AngularJS
 - **Databases:** MySQL, SQL Server, Oracle, MongoDB
 - **Testing:** JUnit, Apache JMeter, Postman
 - **DevOps & Tools:** Maven, Gradle, Jenkins, Git, BAMBOO, Docker, Kubernetes, Apache Tomcat, Apache Jetty, IntelliJ, Eclipse
 - **Methodologies & Others:** Agile/SCRUM, RDBMS, Data Structures, Algorithms
-

Professional Experience

Java FullStack Developer

SOFREGO PRIVATE LIMITED – Sep 2023 – Present

- Developed **scalable backend services** using Java and Spring Boot for web-based platforms.
 - Designed and consumed **RESTful APIs** to integrate internal and external modules.
 - Implemented business logic for hospital and airline domain projects using **Microservices**.
 - Wrote optimized **SQL queries** and managed databases including MySQL, SQL Server, and MongoDB.
 - Used **Maven** for build automation and **Git** for version control.
 - Participated in **Agile ceremonies**, sprint planning, and code reviews.
-

Projects

T2eorem – BFSI France (Banking)

Description:

T2eorem is a banking application for **BFSI France**, managing financial trading and audit trails of client share transactions for **Societe Generale Bank, Paris**. The application tracks client share purchases, credits, debits, profits/losses, triggers automated email alerts, and manages **user provisioning** across business units such as GBSU.

Roles and Responsibilities:

- Developed core **backend modules** and performed **unit testing** using JUnit.
- Implemented **distributed microservices** and integrated **RESTful APIs**.
- Designed and integrated **web services, business objects, and client proxies**.
- Collaborated with frontend teams to build **ReactJS and Angular2 components**.
- Supported **CI/CD pipelines**, including containerization with **Docker** and deployment on **Kubernetes**.
- Managed **database integration** and query optimization across Oracle, MySQL, SQL Server, and MongoDB.
- Ensured system performance and reliability using **monitoring and DevOps best practices**.

Education

Bachelor of Engineering (B.E) – Savitribai Phule Pune University
